THE UK-MAB URBAN FORUM

The Urban Forum of the UK Man and the Biosphere (MAB) Committee is a network of specialists, practitioners and thinkers involved with nature conservation in urban areas. Its mission is to raise awareness, stimulate research, influence policy, improve the design and management of urban systems, and push urban biodiversity and nature conservation up the social and political agenda. Its distinctive contribution to this goal is integrated thinking. The Urban Forum tries to reflect and express these specialisms and the many complex realities they represent. In the breadth of its agenda and the range of its membership, it is unique within the UK.

Members of the Urban Forum come from a wide variety of backgrounds from voluntary organisations to local authorities, government agencies and the private sector: from those primarily concerned with conserving “nature” – plants, wildlife, biodiversity – to those, researchers and practitioners, who work with people and deal with the human use of green space. Currently there are some 27 members who collectively contribute to the continuing reputation of the UK as a centre of excellence in this field. The networking and multi-disciplinary approach which is the hallmark of the Urban Forum is a source of new insights whose promulgation to a wider audience is seen as one of the Forum’s key roles.

The Urban Forum meets four times a year, but much of its work is done through networking and informal task and finish groups. In order to maximise the contribution and commitment of its members, all of whom work in a voluntary capacity and have heavy professional workloads of their own, it sets annual work programmes with a strategic framework and realistic targets for delivery.

The Urban Forum was established as a working group in 1988. Its main work has been in publishing papers, preparing comments on national issues and policies, generating new concepts, guidelines and research, organising conferences and workshops, and networking with other expert groups. Some of its work is done in collaboration with other organisations. It also awards the UK-MAB Urban Wildlife Award for Excellence (which includes the MAB logo) to key demonstration projects – a process that involves site visits and appraisals.

ANNUAL REPORT 2012/2013

Activities
